User Manual

The game begins as you press the enter key. The core gameplay involves using the right and left arrow keys on the keyboard. You control the ninja, the main character, who dodges chainsaws that are randomly placed and moves toward the character. To avoid the chainsaws, the ninja must move in the opposite direction. After the game ends, you can input a three-letter username to save your score. The scoreboard tracks the top three highest scores along with the corresponding usernames. The ninja only has one "life," and is struggling against time as the longer the user plays, the faster the limited time depletes.
